

HOUR LIMPEAV

BACKEND DEVELOPER

ABOUT ME

Fourth-year Software Development student at Norton University with a strong interest in Backend Development. I have experience building RESTful APIs and backend applications using Java, Spring Boot, Node.js, Express.js, MongoDB, and PostgreSQL.

I have developed e-commerce applications involving authentication, product management, order processing, database integration, and REST APIs. I am currently strengthening my skills in Spring Boot, JPA/Hibernate, PostgreSQL, JWT authentication, and backend architecture.

I am looking for a Backend Developer Internship where I can apply my knowledge, learn from experienced developers, and contribute to building reliable and scalable applications.

EXPERIENCES SCHOOL PROJECT

E-Commerce Platform

Node.js, Express.js, React.js, Tailwind CSS, MongoDB, Flutter

- Developed RESTful APIs using Node.js and Express.js for users, products, carts, orders, and payments.
- Built the web application using React.js + Tailwind CSS and the mobile application using Flutter/Dart.
- Implemented JWT authentication, product search/filtering, cart and order management.
- Integrated MongoDB, Bakong KHQR, Google Maps, and automated notifications.

TASK MANAGEMENT

Task Management Application Java, Spring Boot, Spring Data JPA, PostgreSQL, HTML, CSS, JavaScript

- Developed RESTful APIs with full CRUD, pagination, filtering, search, and sorting for task management.
- Built an interactive SPA frontend with a Kanban board, drag-and-drop, and a real-time analytics dashboard.
- Implemented input validation, centralized error handling, and JPA auditing with PostgreSQL.

EDUCATION

2016 - 2022

- 2022 : Graduated High School at Sovannaphumi School High School

2022 - Present

NORTON UNIVERSITY

- Fourth-year student in Semester II, specializing in (Software Development) at NORTON UNIVERSITY.
